Series 27l

General Outline of Sampling Valves with a continuous sample

Characteristic of the discontinuous sample

- unpressurized sample for liquid products and also suitable for **vacuum** samples,
- representative sampling by direct assembly in the pipeline,
- no fore and no after runnings,
- no overflow, because the sample volume is determined per switching function,
- easy operation,
- pocket free seat rings for a sample without dead range,
- no direct connection to the atmosphere when the sample is taken.

Sampling Valves

The following versions can be supplied

- | | | | |
|---------------------|---|---------------------|---|
| • Series 27a | Sampling valve (discontinuous) in stainless steel (TB 27a_EN) | • Series 27h | Drain ball valve (discontinuous) in stainless steel (TB 27h_EN) |
| • Series 27b | Sampling valve (continuous) in stainless steel (TB 27b_EN) | • Series 27i | Sampling valve (discontinuous) in stainless steel (TB 27i_EN) |
| • Series 27c | Sampling valve (continuous) in stainless steel (TB 27c_EN) | • Series 27k | Sampling valve (continuous) in stainless steel (TB 27k_EN) |
| • Series 27d | Sampling valve (discontinuous) with PFA-lining (TB 27d_EN) | • Series 27l | Sampling valve (discontinuous) with PFA-lining (TB 27l_EN) |
| • Series 27e | Sampling valve (continuous) with PFA-lining (TB 27e_EN) | • Series 27m | Sampling valve (continuous) with PFA-lining (TB 27m_EN) |
| • Series 27f | Sampling valve (continuous) in stainless steel (TB 27f_EN) | • Series 22a | Drain ball valve with sample in stainless steel (TB 27h_EN) |
| • Series 27g | Sampling valve (discontinuous) in stainless steel (TB 27g_EN) | | |
